Abdulkerimu Oare

Senior Technical Writer | Help Centres, User Onboarding and API Documentation for B2B SaaS

Abuja, Nigeria (GMT+1, available for US working hours) | +234 806 400 9578 | abdul.oare@gmail.com
abduloare.github.io | linkedin.com/in/abduloare | clippings.me/abduloare

PROFILE

Technical writer with 10+ years in writing and documentation, including 8 years documenting SaaS and enterprise software. I build documentation functions from scratch. In 2026 I built My Car Importer's help centre, staff knowledge base and a 35-video training library from zero. Before that I set up the Technical Writing unit at Access Bank and built Subkit's knowledge base in HubSpot (98% customer satisfaction). I currently document 70+ system integrations for Afreximbank. I work directly with engineers, product managers and support teams, and treat documentation as part of the product: audited, versioned and kept current as the product ships.

EXPERIENCE

Documentation and Training Lead (contract) Jul 2026 to Oct 2026

My Car Importer (US-to-Nigeria car import platform: customer portal and staff ERP) | Remote

- Built the customer help centre from scratch (mycarimporter.com/help): 30 task-based guides in 7 collections that follow the customer journey, from sign-up to bidding, shipping, payments and tracking.
- Built a 49-article staff knowledge base for the ERP; walked through both products before writing and logged bugs and UX issues for engineering.
- Produced a 35-video training library (about 53 minutes) in three series, for prospective car dealers, platform users and staff, adapted from about 3 hours of raw recordings, with every fee and rule checked against official sources.
- Created the onboarding kit (narrated product tours and a 5-email series) and wrote the system documentation from the codebase.
- Ran docs as code and AI-assisted video production: Markdown, scripted publishing, 188 screenshots and GIFs, Gemini text-to-speech, Remotion, with human review of every claim.

Documentation Engineer (Middleware), contract via Revent Technologies Aug 2024 to present

African Export-Import Bank (Afreximbank) | Abuja, Nigeria

- Own end-to-end documentation for multiple enterprise systems: integration flows, APIs, middleware processes and user guides.
- Documented 70+ integration interfaces in Confluence across Fiorano, Boomi, Kafka, SFTP and event-driven architectures, giving engineers and business teams one reliable reference for how systems connect.
- Write solution design documents, business requirement documents and user manuals to enterprise governance standards, working daily with developers, architects and business owners.
- Documented legacy and target-state architectures to support system migrations, cutting rebuild time and preventing knowledge loss when team members moved on.

Team Lead, Technical Writing Dec 2023 to May 2025

Access Bank Plc (Africa-wide financial services group) | Lagos, Nigeria

- Founded the bank's Technical Writing unit; recruited, trained and led the writing team.
- Audited the bank's application catalogue and built a prioritisation matrix to decide which products to document first, based on user volume and adoption gaps.
- Wrote user manuals and onboarding documentation to increase adoption of the bank's digital products across its subsidiaries.
- Authored the technical style guide, API and code documentation templates, and team SOPs; set up a SharePoint knowledge repository as the single source of truth.
- Ran documentation gap analyses and standardised configuration documentation, including a configuration status accounting template for change tracking.

Senior Technical Writer, freelance (Upwork) Feb 2017 to Nov 2023

Remote, SaaS and software clients in the US, UK and Europe

- Wrote help centre articles, user guides, API documentation, tutorials and release notes for SaaS products, with long-term repeat clients.

Subkit (B2B subscription SaaS, New York), Sep to Dec 2022: built the customer knowledge base from scratch in HubSpot for the v2 product launch, covering every feature and workflow; documentation rated 98% in customer satisfaction.

Uphance (cloud ERP for fashion brands, Houston), Dec 2021 to Dec 2022: wrote knowledge base articles, user guides, tutorials and release notes; tested features hands-on before documenting them; introduced version control for the knowledge base.

Lead Consultant and Senior Technical Writer Mar 2019 to present

Axon Consults Ltd | Abuja, Nigeria

- Produced user guides, design documents, maintenance and release documentation, plus case studies, newsletters and whitepapers for B2B and IT service clients.
- Wrote end-user product documentation aimed at reducing customer churn; co-developed SOPs with SMEs for IT help desk and network operations teams.
- Created documentation templates and writing guides adopted by other writers; lifted email campaign open rates from 8% to over 20%.

Leadership Strategy Consultant and Facilitator 2023 to present

Priori Orators | Abuja, Nigeria

- Design and deliver training programmes and facilitator materials for national-level programmes: 2,000+ professionals trained, 96% satisfaction.

Managing Editor and Content Manager Mar 2016 to Mar 2018

Obiaks Digital Media | Abuja, Nigeria

- Ran editorial operations and publication standards for a news website; trained writers; grew revenue 500% through SEO and ad optimisation.

Earlier career, London, UK 2010 to 2016

- Business Development Manager and Technical Writer, LBF Marketing; Customer Advisor and Team Lead, EE (led a 6-person team to GBP 1.5m in sales); Contact Supervisor and Report Writer, UniQue Personnel.
