

Vendor Management System

Statement of Work - Vendor Quick Guide

A short walk-through of everything you do in the SOW module, from setting up your resources to confirming payment.

For vendors

Fig. Your Statement of work list in the vendor portal

SET UP → SUBMIT → GET PAID

What's inside this guide

01

Before you start

Module activation and the resource setup you must do first.

02

How work flows

The seven steps from setup to Paid, end to end.

03

Initiating a SOW

The form, the dates, per-resource documents, and Submit.

04

Tracking & responding

Statuses, reviewer comments, and resubmitting with Resend.

05

Timesheets & invoices

Billing per resource on the submission date, then all together.

06

Getting paid

Request payment, review the proof, confirm, and Paid.

Screens may differ slightly after updates. For anything unclear, contact your Afreximbank focal point.

Before you start

- 1

Wait for activation

“Statement of work” appears in your Vendor Management System (VMS) sidebar only after Afreximbank enables SOW for your organisation. Not visible? Contact your Afreximbank focal point.
- 2

Configure your resources first

Profile → Statement of Work Resource → Add SOW Resource. Enter a Resource Designation and Resource Name per row; + Add Resource adds several at once.
- 3

Reuse them everywhere

Resources are saved once and reusable; they populate the Resource Name dropdown on every new SOW, with the designation auto-filled.
- 4

Have your documents ready

Each resource on a SOW needs its own SOW document. PDF is recommended; PDF, DOC, DOCX, PNG and JPG accepted, up to 10 MB per file.

Fig. The prompt shown when resources are not yet configured

The Configure SOW Resources button on this prompt jumps straight to the setup page under Profile.

Your journey through the module

Every status on your list tells you which step you're on and who owns the next action.

Initiating a SOW

1

Start a new SOW

Statement of work → Initiate SOW.

2

Fill in the SOW details

SOW Project Name · Department · Invoice/Timesheet submission date · Start & End dates · Description. All required; dates use DD/MM/YYYY.

3

Add your resources

Per block: pick the Resource Name from the dropdown (designation auto-fills) and upload that resource's SOW document. "Add another" for more.

4

Save to Draft or Submit

Both sit top-right. Submit asks "Are you sure you want to submit this SOW?" → Yes, Submit. Toast: "SOW submitted for review successfully".

HEADS - UP

- Save to Draft and Submit stay disabled until every resource block has its document uploaded; prepare files first.
- The submission date applies to the whole SOW: one date, all resources.
- Your SOW gets a reference like SOW-363-20260812...; quote it in any follow-up.

Tracking and responding to reviews

- 1

Watch the list

Columns: project name, reference, submission date, Timesheet & Invoice status, initiated date and current status. Search and filter as it grows; the eye icon opens any SOW.
- 2

If it comes back “Not Cleared”

A reviewer returned it with a comment; read it in the Comment panel on the right of the SOW view.
- 3

Edit in place

The form is editable directly on the same page: description, dates, resources, documents. No separate edit screen.
- 4

Click Resend

Enabled once you've made a change. Your SOW returns to Awaiting Approval and review restarts at the first level.

Fig. A returned SOW with the reviewer's comment panel on the right

There is no limit on the review loop: fix, Resend, repeat until cleared.

Uploading timesheets & invoices

- 1

Wait for the date

When your SOW is Approved and its submission date arrives, you are notified and upload buttons appear on each resource card.
- 2

Upload per resource

Click Upload Timesheet & Invoice on a resource → attach both files (both required) → Submit. Toast: “Timesheet and invoice uploaded successfully”.
- 3

Submit them all together

Once every resource has its files, the top-right Submit Timesheet & Invoice button enables → Yes, Submit. The T&I status flips to Awaiting Approval.
- 4

If it's returned

Read the comment, use Update Timesheet & Invoice on the affected resources, then resubmit; the review restarts.

Fig. All resources populated, with Submit Timesheet & Invoice active

Duplicate invoices for the same resource and period are blocked; your SOW's own status stays Approved while you bill.

Requesting payment

- 1

Look for the button

When your timesheets & invoices are approved, Request Payment appears on the SOW view.
- 2

Review the pre-filled mail

Subject: "Payment Request - {SOW ID} - {Your name}". The message is pre-written and fully editable (rich text). Add Cc addresses by typing and pressing Enter.
- 3

Submit

Toast: "Payment request sent successfully". The Timesheet & Invoice status becomes Payment Requested.
- 4

Nothing to attach

VMS emails Afreximbank Finance (your reviewers on Cc) and automatically attaches one zip per resource with the approved SOW, timesheet and invoice.

Fig. The pre-filled Request Payment mail template

The Finance address was configured by the bank; you never type it. Keep the SOW reference in the subject line.

STEP 5 · CLOSE OUT

Confirming payment

- 1

You're notified of the proof

When Afreximbank uploads proof of payment, the T&I status becomes Awaiting Payment Confirmation and you are notified.
- 2

Review the Payment Proof

Open the SOW; the Payment Proof section sits above your resource blocks, with download and preview icons.
- 3

Click Payment Received

Confirm with Yes, Confirm. Toast: "Payment confirmed as received successfully".
- 4

Done. Status: Paid

The Timesheet & Invoice status becomes Paid (final). Your reviewers and bank operations are notified automatically.

Fig. Confirming payment: the prompt, with the Payment Proof attached

Verify the payment on your own bank account before clicking Payment Received; confirmation is the final step of the cycle.

Statuses at a glance (your portal's labels)

SOW status

“Not Cleared” means it is back with you; edit the SOW in place and click Resend to restart the review.

Timesheet & Invoice status

GOOD TO KNOW

- Two independent trackers: the SOW status covers the agreement and stops at Approved; billing and payment move on the Timesheet & Invoice status.
- Reviewer comments live in the Comment panel on the SOW view; the Payment Proof sits above your resource blocks.
- You are notified at every hand-off: returned SOWs, approvals and payment steps.

Full step-by-step detail: *Vendor User Manual, section 6 (Statement of Work).*

Thank you

for working with Afreximbank.

The Vendor User Manual, section 6 (Statement of Work), walks every step in this guide with screenshots. For access or account questions, contact your Afreximbank focal point.
